

How to Fold an Origami Deer

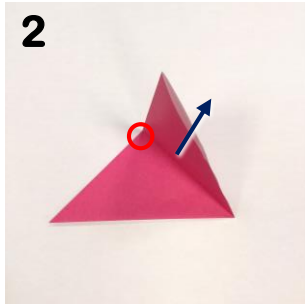

Prepare two origami papers, a pair of scissors, and a glue stick, and now you are ready to make an origami deer!

STEP 1: Bases

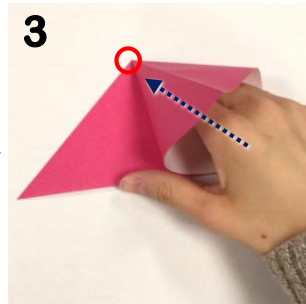

Make **TWO bases** (which are going to be an upper body and a lower body)

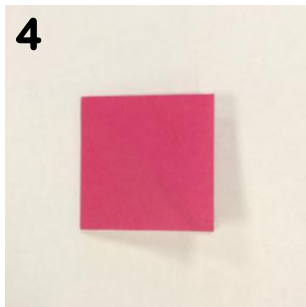

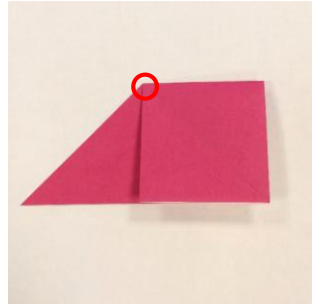

① Fold the paper in half.

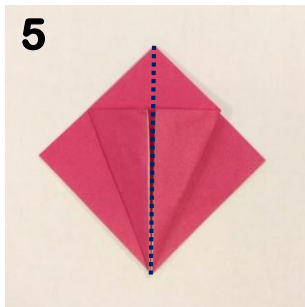

② Fold in half again and stand the top layer upward.

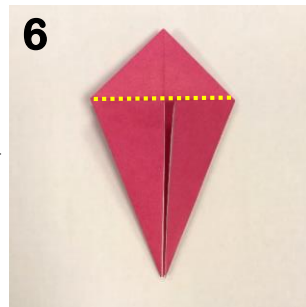

③ Insert the index finger into the corner (marked as red circle), press down and make a square.

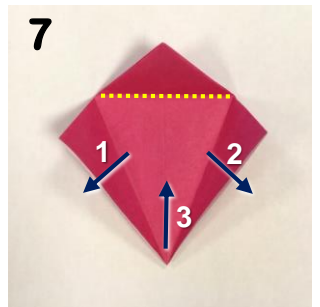

④ Turn it over and do the same to the other side.

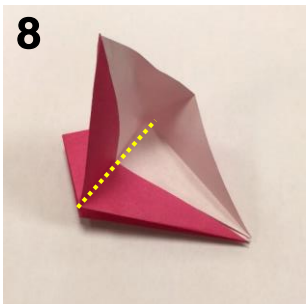

⑤ Place the open side at the bottom (toward you), and bring the sides to the center crease.

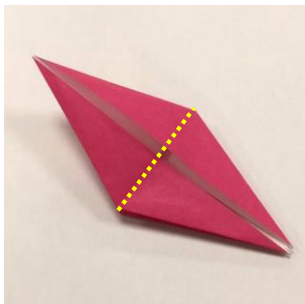

⑥ Turn it over and do the same to the other side, and make the solid crease at the yellow dotted line by folding it back and forth.

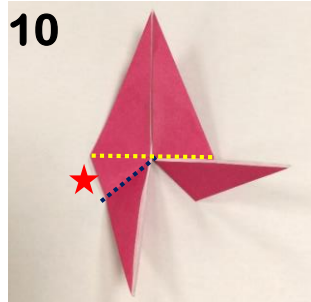

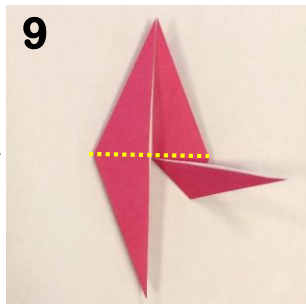

⑦ Open the top layer from 1 to 3 in order, keeping the top part above the yellow dotted line closed.

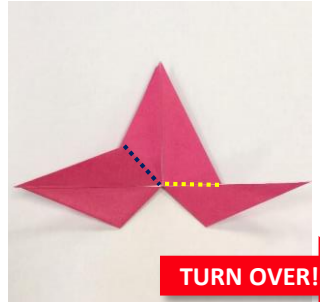

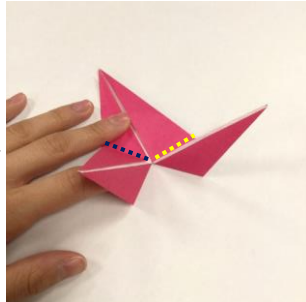

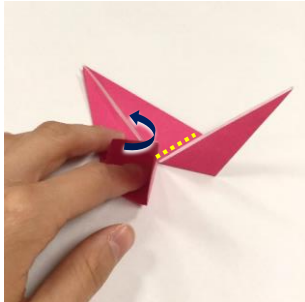

⑧ Open carefully by following the existing creases and make a diamond shape. Then, do the same to the other side.

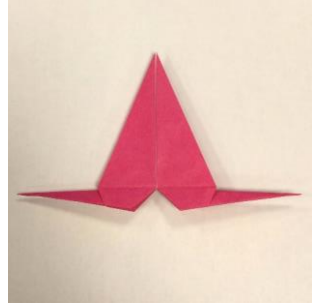

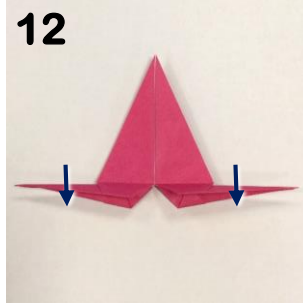

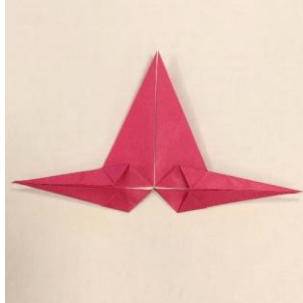

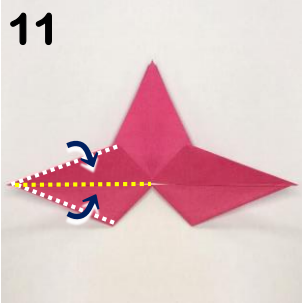

⑨ Place the leg-like part at the bottom (toward you) and bring the bottom part up to the center crease, which should be horizontal.

⑩ Unfold once. Insert a finger from outer side (marked as ★), follow the existing creases and press down, keeping the top part above the center crease (yellow dotted line) closed. Do the same on the right side.

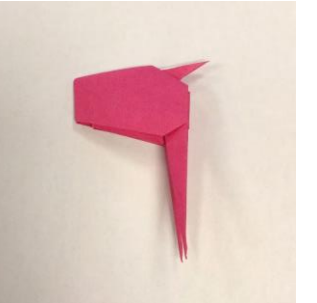

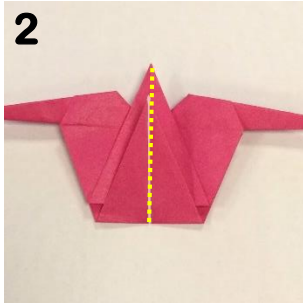

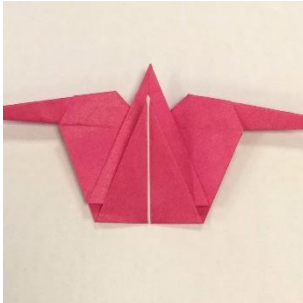

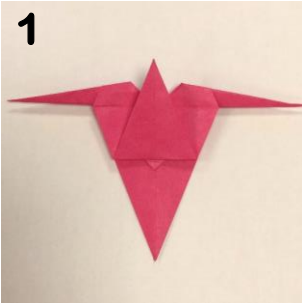

TURN OVER!

⑪ Fold both sides (white dotted lines) to the center crease (yellow dotted line). Do the same on the other side.

⑫ Fold down in an arrow direction and the base is complete. Move on to step 2.

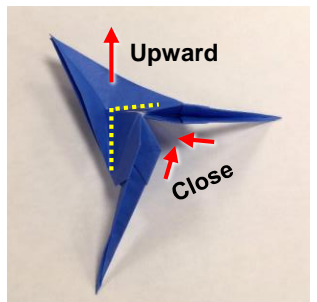

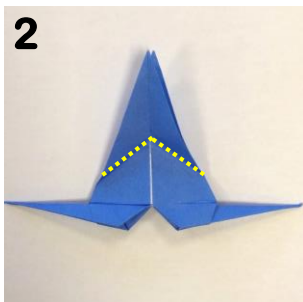

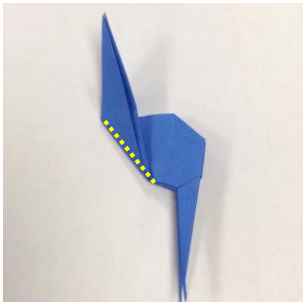

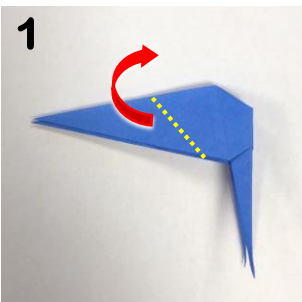

STEP 2: Lower Body (One of the two bases)

① Place the base upside down and fold only the top layer upward roughly in the middle.

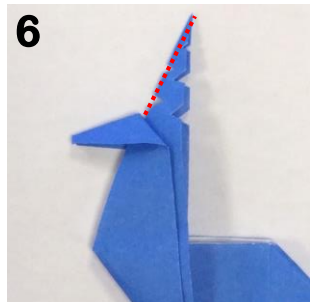

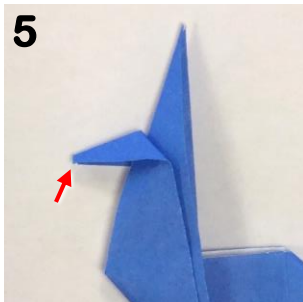

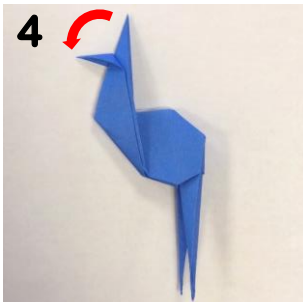

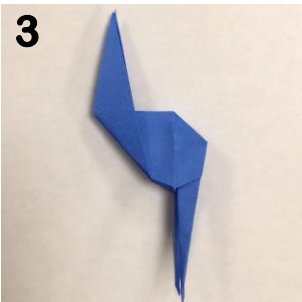

② Fold in half along the yellow dotted line, and the lower body is now complete. Move on to step 3.

STEP 3: Upper Body (The other of the two bases)

① Fold the base in half and make the solid crease along the yellow dotted line by folding the edge upward.

② Unfold it twice, bring the top edge upward by following the yellow dotted line, and close the arms as shown in the picture.

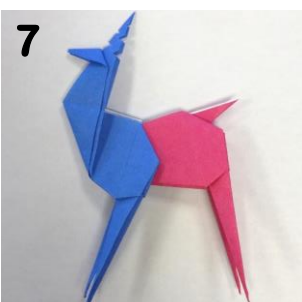

③ Now the neck is complete.

④ Pull out the first layer in front to make the face.

⑤ Fold the edge of the face inside to make the nose round.

⑥ Make some triangle cuts on the antler on both sides, then cut it in half on the red dotted line.

⑦ Stick the two bodies together with glue (make sure the lower body comes inside the upper body) and voilà!

Share your lovely deer on Instagram and get our unique gift!
